Education

Georgia Institute of Technology

Bachelor of Science in Computer Science

Atlanta, Georgia

August 2023 – May 2026

- Concentrations: Artificial Intelligence and Information Internetworks | GPA: 3.77/4.0
- Coursework: Objects and Design, Data Structures and Algorithms (DSA), Object-Oriented Programming with Java, Robotics: AI Techniques, Database Systems, Machine Learning, Computer Networking, Intro to Artificial Intelligence
- Clubs/Programs: WebDev Club (Project Lead), Student Government Association IT Board (Developer), Barcelona Study Abroad (Summer 2024), SIG First Year Discovery Day, Microsoft SWE Shadowship Program
- Honors: Ramp Capture The Flag Challenge (7th place out of 1300+), Zelle Miller Scholarship (Full tuition)

Experience

Incoming Software Engineer Intern

Google

May 2026 – August 2026

Mountain View, California

- Building a debugging agent that resolves flaky tests for Chrome Browser Infrastructure within Platforms and Devices org.

Software Engineer Intern

Cisco Meraki

May 2025 – August 2025

San Francisco, California

- Developed a client topology solution for the Meraki AI Assistant using Python and TypeScript, available to 500,000+ users.
- Built a LangChain-powered AI tool that leverages internal REST APIs to generate responses to client topology queries.
- Created a client topology widget that formats AI-generated responses in an intuitive interface for network administrators.
- Integrated the complete topology solution into the AI Assistant's troubleshooting workflow, which leadership recognized as a top 3 use case for the AI Assistant.

Teaching Assistant

Georgia Tech College of Computing

August 2024 – Present

Atlanta, Georgia

- Taught CS 4261: Mobile Apps & Services (Spring 2026) and CS 1331: Object-Oriented Programming (Fall 2024, Spring 2025).
- Led weekly discussions for student teams through sprint-based mobile app projects, emphasizing idea validation, user testing, and iterative product development.

Project Lead

GT WebDev Club

January 2024 – Present

Atlanta, Georgia

- Directed full-stack web projects with 10 developers each semester, promoting agile software development practices.
- Built 3 MERN web apps over 3 semesters: dorm roommate matcher, lost & found system, a room-design platform.

Software Engineer Intern

Georgia Tech Research Institute (GTRI)

January 2024 – May 2024

Atlanta, Georgia

- Developed secure file-sharing web application for the military under a multi-million dollar DoD contract for 10,000+ users.
- Utilized HTML, CSS, Angular (TypeScript) to create responsive frontend components enhancing user experience.
- Implemented backend functionalities using Java for data processing and retrieval from OracleSQL database.
- Added 25+ Java and TypeScript unit tests, spearheaded AngularJS-to-Angular 6 migration, implemented sorting feature for audited messages.

Projects

Course Critique @ Georgia Tech SGA | NextJS, SQL, Firebase

August 2025 - Present

- Revamping Course Critique, an application used by 15,000+ students to view course information and average GPA's.
- Utilized Firebase authentication for multi-platform sign-in and Firestore for a starred courses/professors feature.

Profound.ai @ HackGT | ReactJS, Tailwind CSS, Flask, MongoDB, LangChain, OpenAI API

September 2024

- Developed a RAG-powered AI lecturer agent that dynamically presents lecture slides and supports real-time student Q&A.
- Extracted text content from course files using Canvas API and stored each document as a vector embedding in MongoDB.
- Leveraged LangChain to inject context from embeddings into the LLM when generating accurate audio transcripts.

GT StudyHive @ WebDev Club | Firebase, ExpressJS, ReactJS, NodeJS, Postman

January 2024 – May 2024

- Built a FERN application enabling Georgia Tech students to discover, start, or join active study sessions across campus.
- Integrated Google Maps API for real-time location rendering and added secure user authentication using Firebase.

Technical Skills

Languages: Java, Python, JavaScript, TypeScript, HTML, CSS, SQL

Frameworks/Databases: React, Angular, NodeJS, NextJS, MySQL, MongoDB, Tailwind CSS, Flask, Firestore

Technologies/Tools: Docker, Scikit-Learn, Jupyter Notebook, Pandas, NumPy, TensorFlow, Android Studio, Postman API, Jira, Git, GitLab, GitHub, VS Code, IntelliJ, REST APIs, CI/CD, SDLC, TDD, Figma, AWS (S3, CloudFront), Blender, Firebase

Certifications: AWS Certified Cloud Practitioner (CCP), MTA Software Development Fundamentals
